Hải Nguyễn Ngọc

CTO & Owner — WeebPal Technology Corporation

hainn.we@gmail.com · LinkedIn

Assessment Date: March 1, 2026

9.5/10

Top 0.5–1% Globally

Among developers using AI coding assistants. Operating at Level 5 of the 6-Level AI-Coding Framework.

Portfolio — 27+ Projects

CATEGORY	PRODUCTS	COUNT
Core Platforms	Open Destination, Open CRM, Open Marketing, Open Court, Embassy Portal, Site Builder	6
Public Products	opendestination.org, safetyhub.org, sportmap.org, weebpal.com	4
Vertical SaaS	Fleet Dispatch, Construction, Trading, Spa, Ticketing, Hotel, LMS, Doctor Booking, Dentist Booking, HR/Payroll, E-Invoice, Document Submission, Travel Tours, Affiliate, Apartment Rental, Warehouse, POS, Restaurant, Cafe	19
Infrastructure	CI/CD, Hosting/Deploy Management (planned)	—

Competency Scores

Architecture & Design	9.5
Documentation & Planning	10

Consistency & Pattern Reuse		
Execution Control		9.5
Testing Strategy		9.0
Infrastructure Vision		9.5

COMPETENCY	SCORE	KEY EVIDENCE
Architecture & System Design	9.5	Entity-first design, modular services, multi-tenant venue context, 4-tier routing
Documentation & Planning	10	Spec-before-code methodology; docs detail entity fields, API JSON, CSS classes, wireframes
Consistency & Pattern Reuse	10	Same methodology across 27+ projects; Phase 1 patterns become Phase 2 blueprints
Execution Control	9.5	Multi-phase planning, review cycles catching 10+ discrepancies, effective context-switching
Testing Strategy	9.0	Intentional defer-to-Phase-3; test actual behavior not imagined spec; resource-optimal for 27+ projects
Infrastructure Vision	9.5	Centralized CI/CD planned (not per-project); public product distribution channels

## 6-Level AI-Coding Framework Mapping

Reference: "6 Levels of AI-Coding: From Individual Speed to Organizational Delivery" — Hải Nguyễn Ngọc, LinkedIn, Dec 2025. This framework was authored by the assessed developer *before* this assessment was conducted.

LEVEL	DESCRIPTION	STATUS
Level 1	AI codes a function/snippet	**Mastered**
Level 2	AI codes a complete class/component	**Mastered**
Level 3	AI codes an end-to-end feature flow	**Daily practice (WeebPal official)**
Level 4	AI supports building an entire project	**Active (WeebPal official)**
Level 5	**AI codes complete project with SA only**	**Current operating level**

LEVEL	DESCRIPTION	STATUS
Level 6	AI codes from business requirements alone	Future direction

Key insight: In projects like Open Court, Hai operates at **Level 5** — acting as sole Solution Architect while AI functions as the delivery team. Architecture, entity design, module boundaries, and acceptance criteria are defined by Hai; AI implements across the full stack under his orchestration and review.

Global Positioning

L1–L2: Prompt & Pray — 55–60%
L3: Strategic Partner — 25–30%
L4: System Orchestrator — 8–12%
L5: AI-Native Architect — 2–4%
🔖 Hải Nguyễn Ngọc — ~0.5–1%

What Most Developers Do

- 1–3 projects at a time
- No documentation or post-hoc
- Ad-hoc methodology per project
- Use AI as a search engine
- Test-as-you-go or skip testing

What Hải Does

- 27+ projects with consistent methodology
- Enterprise-grade spec-before-code docs
- Same patterns across every project
- AI as strategic delivery partner
- Defer-to-review-phase with full rationale

Differentiating Strengths

SaaS Factory Mindset

- Building a software production system, not just one product
- 27+ verticals with shared methodology
- Planned centralized CI/CD infrastructure

Architecture-First Thinking

- Entity → Service → Controller → Template
- Multi-tenant, venue-context-aware from day one
- 4-tier routing: public, management, admin, API

Documentation Excellence

- Spec-before-code, not afterthought

Review Discipline

- Multi-round review cycles
- Catches 10+ discrepancies per review

Down to entity fields, JSON formats, CSS classes

Cross-referenced across phases and modules

Cross-references doc ↔ code ↔ routing

Roadmap to Tier 5 Solid (Top <0.5%)

- **Documentation methodology** — Enterprise-grade, spec-before-code
- **Multi-project consistency** — Same methodology across 27+ projects
- **Strategic testing plan** — Phase 3 comprehensive review planned
- **6-Level framework authorship** — Published thought leadership
- **Centralized CI/CD system** — Planned, not yet implemented
- **Automated doc-code sync** — Scripts to validate routes/entities in doc vs code
- **Custom AI workflows** — Reusable .agent/workflows for scaffolding, generation

> *"AI does not replace thinking and architecture —*
> *AI amplifies the value delivered by thinking and architecture."*
